Database Passwords can be found in the Useful Student Resources section in your Student Portal/Moodle.

- **ProQuest:** <https://search.proquest.com/healthresearch>

ProQuest Health Research Premium Collection includes the following databases:

1. **Health & Medical Collection**
In-depth coverage from leading biomedical publications.
2. **Nursing & Allied Health Database**
Reliable healthcare information covering nursing, allied health, alternative and complementary medicine, and much more.
3. **Healthcare Administration Database**
A collection of reliable and relevant resources in the field of health administration, including journals and dissertations.
4. **Psychology Database**
Key information from leading psychology and psychosomatic publications.
5. **Public Health Database**
A global resource for students, faculty, researchers, clinicians, policy makers, and all others involved in the study of population and public health.
6. **Consumer Health Database**
Journals and magazines covering an enormous range of health subjects, from sports injuries to women's health, from food and nutrition to midwifery, from eye care to dentistry.
7. **MEDLINE® (Citations only)**
A bibliographic database produced by the U.S. National Library of Medicine (NLM).

Additional resources via ProQuest include:

1. **Coronavirus Research Database**
A free health and medical research database for openly available content related to the COVID-19 outbreak.
2. **Publicly Available Content Database**
Designed to complement other databases and collections, this database brings together or links to full text for publicly available content from a number of different sources from around the world.

- **Natural Medicines:** <https://naturalmedicines.therapeuticresearch.com/>
Designed for practitioners in the complementary and holistic medicine areas, as well as interested individuals, it has a wealth of information in several sections. Natural Medicines includes over 1500 monographs on herbs, vitamins and minerals, supplements and foods, as well as complementary and alternative treatments, including specialized diets.
Each monograph is also available as patient handout in a number of languages. In addition to the monographs, Natural Medicines also includes a database of commercially available dietary supplements, comparisons of effectiveness of substances and treatments and details of interactions of different substances.
